

#1 IN FOOD TRUCK VENTILATION SYSTEMS

LBOX-AV Low Box Concession Hood with Integrated Blower and Motor

New, Industry first, Patent Pending UL710/762/1978 Listed Low Box with Advanced Ventilation (LBOX-AV) hood system with integrated blower and motor. No more fans on the roof, reduced installation time, and side mounted louver are just a few of the benefits versus the standard conventional Concession/Food Truck hoods. All Concession style hoods are UL, cUL, NSF, and NFPA approved.

- Factory Mounted Grease Duct with Louver
- Simplified product install. No welding, all electrical penetrations inside (trailer/truck)
- Standard sizes range from 4'-0" - 6'-0" long with single blower and outlet, 7'-0" - 10'-0" long with dual blowers and outlets
- 7" front and a 24" back to accommodate the low ceiling height of trailers and trucks
- Hoods include a 1" Ceiling enclosure installed on top of hood
- Fastest lead times for shipping
- Hoods are available with or without pre-piped Fire Suppression. Pre-piped packages meet strict UL-300 fire test criteria for safe and reliable fire protection. You can choose from KIDDE or ANSUL brand systems.

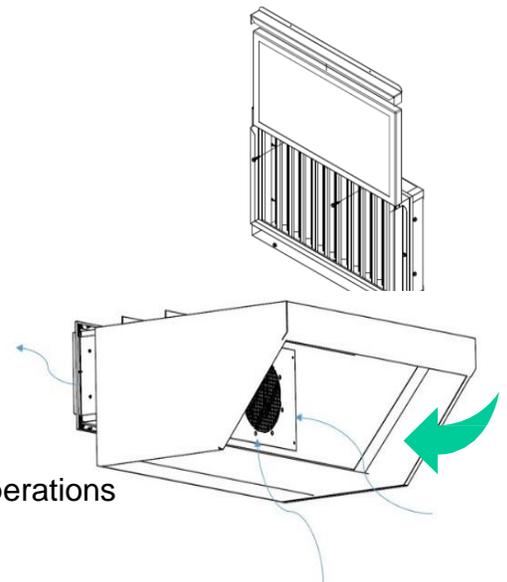

LBOX-AV Low Box Concession Hood with Integrated Blower and Motor

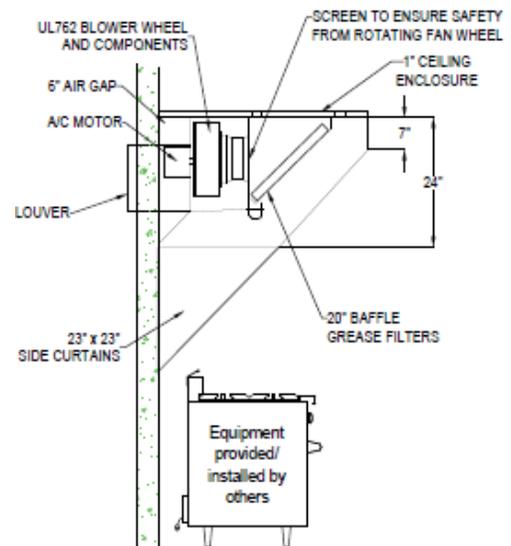

Features:

- Louver design tested to AMCA standards. Ensures rainwater at hurricane forces is kept out.
- Integrated blower and motor, no fan needed on roof. Allows all electrical tie-ins to be performed inside mobile unit.
- Hanger Rails to allow mounting to Trailer/Truck. Reduces installation time and No Welding needed.
- Full Stainless-Steel Series ensures long-term trouble-free operations.
- 20" Tall Stainless Steel Grease Filters allow for Larger Capture area.
- Built in 6" Airgap – Meets / Exceeds clearance to combustibles available with Zero Clearance Insulation.

Hood Length	Hood Width	Blower Motor(s)	Min Exhaust CFM per Linear Ft.
4.0'-6.0'	40"	1	200
7'-0"-10.0'	40"	2	200
