## INTRODUCTION

### NAKS, Inc. Commercial Kitchen Exhaust Systems

Models SW-NAKS-CK, DW-NAKS-CK-RC and DW-NAKS-CK-ZC are factory built high pressure and high temperature exhaust systems for various type of appliances. Model SW-NAKS-CK is Single Wall. Models DW-NAKS-CK-RC and DW-NAKS-CK-ZC are Double Wall. All Models may be intermixed in the same grease duct or chimney system.

All Models are intended for use in kitchen ventilation such as Grease Ducts and Dishwasher Exhaust.

### Research and Development

NAKS, Inc. employs only Underwriters' Laboratories (UL) for testing, certifications, and listings to all applicable UL and ULC Standards.

### All Stainless Steel Construction

The entire construction is stainless steel. Including all accessories such as supports and angle rings.

This means there is no cross contamination in the factory from carbon steel cutting/welding.

The inner pipe and the outer jackets have laser welded seam and all fittings are tig welded. Jeremias cleans all external welds to assure the customer clearly sees the quality standard we are setting.

### Best Insulation

NAKS, Inc. DW-NAKS-CK-RC uses 8 PCF ceramic fiber insulation that has neither binder nor lubricant and does not emit any fumes or smell during the first high temperature firing.

We compress this 1½" thick blanket into a 1¼" area delivering better clearances and skin temperatures than other loose-fitting blanket insulated pipes. This compressed insulation also eliminates the need for brackets and spot welding between the inner and outer jacket - this means less weight and no hot spots at the joints. This also eliminates any chance of insulation settling during shipment and storage.

See the installation clearance example using the same pipe I.D. as compared to other manufacturers. For example, Model DW-NAKS-CK-RC is clearly the industry leader in the smallest required footprint.

NAKS, Inc. Model DW-NAKS-CK-ZC uses 10 PCF ceramic fiber insulation of the same quality to fill the ¾" space between the inner and outer jackets.

# INTRODUCTION

## Largest Joint Connection Surface Area / Easiest Install

NAKS, Inc. Commercial Kitchen exhaust systems utilizes a **Patent Pending** technology which is the absolutely **easiest to install** in the industry.

Installation:

1. Apply silicone to the male side
2. Push the ends together
3. Install the locking band.

The installed joint creates a liquid-tight seal. This easy installation saves an estimated **50% labor savings** over flange to flange assemblies.

The overlapping inner also protects the silicone seal against high-pressure washings in commercial kitchen exhaust. It also self-aligns the inner pipe eliminating a third person on horizontal installations and quicker installs on the vertical. This is industry best connection for **leak-free** installations!

All pipe lengths can be **field cut-to-fit** making this the most installer friendly system available. Since various pipe lengths and adjustable lengths are not required, a twelve (12) part **Standard Items** list can be used to make up any exhaust system.

Double Wall Model DW-NAKS-CK-RC

Single Wall Model SW-NAKS-CK

Double Wall Model DW-NAKS-CK-ZC

# TECHNICAL SPECIFICATIONS

## Model and Part Identifications

Part numbers include the Model, diameter, item code, and suffix (if applicable)

Example 1: SW-NAKS-CK18-36L for a Model SW-NAKS-CK single wall, 18 inch inner diameter, 36 inch length of pipe.

Example 2: DW-NAKS-CK10-90WT-RC for a Model DW-NAKS-CK-RC double wall, 10 inch inner diameter, 90° Wye Tee.

## Material and Thicknesses

Inner Liner:  
Stainless Steel, thickness per UL-1978 and UL-2221

Insulation:  
**SW-NAKS-CK:** None  
**DW-NAKS-CK-RC:** 1.5" thick 8 PCF ceramic fiber, compacted to 1.25" (9.6 PCF net effective)  
**DW-NAKS-CK-ZC:** 3.25" thick 10 PCF ceramic fiber

Outer Jacket:  
Stainless Steel, thickness per UL-1978 and UL-2221

Supports and All Accessories:  
Stainless Steel

## Underwriters Laboratories (UL) Listings

United States:

### SW-NAKS-CK

1. UL-1978 Standard, Grease Duct

### DW-NAKS-CK-RC

1. UL-1978 Standard, Grease Duct

### DW-NAKS-CK-ZC

1. UL-1978 Standard, Grease Duct
2. UL-2221 Standard, Tests of Fire Resistive Grease Duct Enclosure Assemblies

## Code and Standards

Models SW-NAKS-CK, DW-NAKS-CK-RC, and DW-NAKS-CK-ZC installed per their Installation Instructions are code compliant with:

- CSA-B149

- NFPA 96
- NFPA 211
- NFPA 54
- NFPA 31
- NFPA 37
- IMC
- IFGC
- UMC
- CMC

The following organizations produce one or more of the above references codes and standards or provide important guidelines for installation and use of the SW-NAKS-CK, DW-NAKS-CK+1, and DW-NAKS-CK-ZC exhaust systems:

- ASHRAE (American Society of Heating, Refrigerating and Air Conditioning Engineers)
- CSA (Canadian Standards Association)
- ICC (International Code Congress)
- IAPMO (International Association of Plumbing and Mechanical Officials)
- NFPA (National Fire Protection Association)
- UL (Underwriters Laboratories, Inc.)

## Operating Pressures

Models SW-NAKS-CK, DW-NAKS-CK-RC, and DW-NAKS-CK-ZC have been evaluated and Listed by UL for positive internal static pressures up to 20" W.C.

## Operating Temperatures and Clearances

### Operating Temperatures:

Criteria	Permitted Temperatures
UL-1978 Grease Duct ULC-S662 Grease Duct	500°F (260°C) Continuous 2000°F (1093°C) for 30 Minutes

### Minimum Airspace Clearance to Combustibles:

Inside Diameter	SW-NAKS-CK Single Wall Grease Duct	DW-NAKS-CK-RC Double Wall Grease Duct	DW-NAKSCK-ZC Double Wall Grease Duct
3" (76mm) to 6" (152mm)	18" (457.2mm)	2.00" (50.8mm)	0.0" (0.0mm)
7" (102mm) to 14" (456mm)	18" (457.2mm)	2.00" (50.8mm)	0.0" (0.0mm)
16" (406mm) to 34" (863mm)	18" (457.2mm)	3.00" (76.2mm)	0.0" (0.0mm)
36" (914mm)	18" (457.2mm)	4.00" (102mm)	0.0" (0.0mm)
38" (965 mm) to 48" (1219mm)	18" (457.2mm)	5.00" (127mm)	2.00" (50.8mm)

NAKS, Inc. Model SW-NAKS-CK single wall may be field insulated. Follow NFPA 96 regarding methods of achieving reduced clearances, zero clearances, or fire resistance enclosures for Grease Ducts.

NAKS, Inc. Model DW-NAKS-CK-RC uses 1.5" thick ceramic fiber blanket that is compressed to a 1.25" space for reduced clearances to combustibles. One external layer of field-applied fire-wrap meets the ASTM E2336 requirements.

Do not wrap or place any type of insulation in the required airspace surrounding the Building Heating Appliance Chimney applications in an effort to reduce the clearance to combustibles or to create some sort of fire protective enclosure.

### Clearance to non-combustibles:

As required for installation, access, inspection, latest NFPA, or per local code.

## Joint Details

Model SW-NAKS-CK single wall commercial kitchen exhaust incorporates a male/female overlapping joint and locking band. This Patent Pending connection permits any pipe length to be cut to fit in the field.

NAKS, Inc. supplied J-600 sealant is applied 1.5 inch from the end on the male side, that male end is inserted into the female end, and secured in place by the locking band to create a liquid-tight seal.

Model SW-NAKS-CK Joint Assembly Detail

Model DW-NAKS-CK-RC & DW-NAKS-CK-ZC double wall incorporates the same overlapping inner of SW-NAKS-CK and has an external locking band. This Patent Pending connection permits any pipe length to be cut to fit in the field.

NAKS, Inc. supplied J-600 sealant is applied on the inner male side, that male end is inserted into the female inner, and secured in place by the locking band to create a liquid-tight seal.

Model DW-NAKS-CK-RC & DW-NAKS-CK-ZC Joint Assembly Detail

## Sizing/Pressure Calculations

NAKS, Inc. engineering uses its own software based upon the "Chimney, Gas Vent, and Fireplace Systems" chapter of the ASHRAE Handbook to assure that the exhaust and chimney system is sized in accordance with the appliance manufacturers' installation instructions.

## Submittal and Warranted Designs

NAKS, Inc. also provides CAD layout designs that show all required accessories including drains, supports, access panels, etc., permitting it to be installed in accordance with any specific appliance manufacturers' installation instructions.

## Pipe Weight per Foot

The approximate installed weight of the NAKS, Inc. exhaust systems can be found using this table. This table does not include accessories such as supports and guides, nor shipping packaging or palletizing weight.

Pipe Weight:

Inside Diameter	SW-NAKS-CK lb/ft	DW-NAKS-CK-RC lb/ft	DW-NAKS-CK-ZC lb/ft
6" (152mm)	2.2	6.3	9.3
